

To: Domestic Agencies

Reference: **META SNC CFT ref. T-0000-COM-CFT-0001**

Subject: Call for Nominations – Supply of Thermal Insulation materials for the Tokamak Cooling Water System (First Plasma Scope)

Dear Colleagues,

The ITER Organization (IO) invites the Domestic Agencies to nominate companies, institutions or other entities that are capable to supply Thermal Insulation materials for the Tokamak Cooling Water System. The scope of supply includes also design, qualification, manufacture and miscellaneous services.

Please find attached a description of the planned procurement. Kindly note that the planned procurement is going to be handled by META SNC (CFT ref. T-0000-COM-CFT-0001) which is IO's contractor in charge of the Tokamak Complex Contract No. 2 (the "TCC2 contract"). The TCC2 contract was already inclusive of the installation of those thermal insulation materials. The IO is only providing potential candidates through this call for nominations. The IO is going to witness the procurement process handled by META SNC and will ensure the application of IO main procurement principles. META SNC will be the contracting entity meaning that they keep the overall responsibility of this procurement.

The potential candidates should have a recognized level of expertise, competence and references in the field mentioned above. The META SNC will invite them to prequalify.

If you can nominate suitable potential candidates, please provide us with their contact details using the attached Excel template.

Please send your proposals by e-mail to [philippe.gambino@iter.org](mailto:philippe.gambino@iter.org) by **9 March 2023** at the latest.

Yours faithfully,

Philippe Gambino  
Procurement Construction Assembly Logistics
